

Mobile Apps

What they are:

- Mobile apps provide a formatted version of text, video, graphic content tailored for a smaller screen like a smartphone or tablet.
- The library has about 118 databases linked to their website. Most of these databases provide mobile apps. shareable with iOS, most android and Kindle.
- Mobile apps usually require a registration with the website sometimes with a QR Code, if the mobile app is a native app or sponsored by that website.

Types of Gates Library mobile optimized websites:

- Dictionaries, encyclopedias, handbooks, etc.
- Journal, magazine, newspaper articles
- Books, text and audio

Examples of Gates Library databases with mobile apps:

- Encyclopedia Britannica
- Net Library e-book collection
